PROFESSIONAL SUMMARY

Senior Java engineer with 9+ years delivering enterprise systems across energy, banking, and HR. Java/Spring specialist in high-volume processing, integration, and database performance who eliminated 10+ minutes of duplicate work per participant registration.

CORE EXPERTISE

Java and backend: Java 8/11/17/21, Spring Boot, REST APIs, OpenAPI/Swagger, microservices, system design

Data and messaging: PostgreSQL, MariaDB, SQL Server, Redis, RabbitMQ, JPA/Hibernate

Testing and delivery: JUnit, Mockito, Testcontainers, Jenkins, CI/CD, Maven, Gradle, Git, GitHub, GitLab

Platforms and frontend: Linux, Docker, Kubernetes, Angular, React; cloud exposure: AWS, GCP, Azure; Agile/Scrum, Jira

PROFESSIONAL EXPERIENCE

Exist Software Labs, Inc.

Apr 2016 to Oct 2025

Software Engineer, 2016-2020 | Senior Java Software Engineer, 2020-2025

- **Energy contract processing:** Owned a Java/Spring module serving hundreds of market participants and processing 8,000+ row time-series uploads.
- **Bulk upload performance:** Improved end-to-end validation and processing speed by more than 90% with JDBC batch inserts and exposed exact row-level errors.
- **Energy platform redesign:** Reduced PostgreSQL reporting and bulk-processing times by 50-90% through schema design, query rewrites, and indexes; updated workflows for new participant categories and contract types.
- **Government registration:** Independently delivered a Java/Spring API with authentication, validation, duplicate prevention, audit logging, and dozens of document mappings.
- **Registration outcome:** Eliminated 10+ minutes of duplicate work and approximately 5-10 forms per participant registration.
- **HR and payroll:** Replaced email-and-phone loan approvals with an HRIS workflow and synchronized approved loans to a legacy system through RabbitMQ.
- **HR database performance:** Reduced PostgreSQL employee queries from seconds to milliseconds through ORM lazy-loading corrections and targeted indexes.
- **Banking:** Delivered secure customer-bank messaging and raised automated test coverage from 20% to 80% across assigned trade-finance modules.
- **Energy billing:** Consolidated billing data from approximately five systems into one production calculation and invoice workflow.
- **Leadership:** Mentored approximately 10 junior engineers through onboarding, task breakdown, pair programming, reviews, debugging, and design guidance; coordinated delivery with project managers and clients.

EDUCATION AND LANGUAGES

Bachelor of Science in Information Technology | Pamantasan ng Lungsod ng Valenzuela | 2016 | Filipino, English
