PROFESSIONAL SUMMARY

Senior Java Software Engineer with 9+ years of experience delivering high-throughput enterprise systems across energy, banking, and HR domains for multi-client enterprise engagements. Specialized in Java (Spring Boot), microservices, distributed messaging, PostgreSQL query optimization, and resilient system integration.

CORE EXPERTISE

Java & Backend: Java 8/11/17/21, Spring Boot, REST APIs, OpenAPI/Swagger, Microservices, System Design

Data & Messaging: PostgreSQL, MariaDB, SQL Server, Redis, RabbitMQ, JPA/Hibernate

DevOps & Cloud: Docker, Kubernetes, AWS (ECS, RDS, S3, SQS), Linux, CI/CD (Jenkins, GitLab), Maven, Gradle, Git

Testing & Telemetry: JUnit 5, Mockito, Testcontainers, CloudWatch, Prometheus, Integration Testing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Exist Software Labs, Inc. — Apr 2016 – Oct 2025

Senior Java Software Engineer — Jan 2020 – Oct 2025

- **Architected PostgreSQL schema redesign, query rewrites, and indexing strategies**, reducing reporting and bulk-processing latency by 50–90% for a multi-tenant energy market platform.
- **Optimized time-series ingestion pipeline via JDBC batching and parallel validation**, cutting processing latency by 90% while ensuring 100% data integrity for high-frequency energy telemetry uploads.
- **Consolidated disparate billing feeds from five legacy systems** into an automated calculation and invoicing engine, eliminating manual reconciliation overhead and accelerating monthly billing cycles.
- **Engineered an HRIS loan approval workflow integrated via RabbitMQ**, replacing manual email/phone processes and cutting database query latency from seconds to milliseconds via ORM lazy-loading fixes.
- **Mentored 10 junior engineers** through technical onboarding, task breakdowns, architecture design guidance, and code reviews; coordinated sprint deliveries directly with project managers and clients.

Software Engineer — Apr 2016 – Dec 2019

- **Engineered a secure Java/Spring participant registration API** with token authentication, duplicate prevention, and document mappings, eliminating 10+ minutes of manual entry and 5–10 forms per registration.
- **Elevated automated test coverage from 20% to 80%** across trade-finance banking modules using JUnit, Mockito, and Testcontainers, significantly decreasing regression defect rates.
- **Delivered secure customer-bank messaging services** and maintained high-availability Java/Spring APIs sustaining 99.9% uptime for hundreds of active market participants.

EDUCATION AND LANGUAGES

Bachelor of Science in Information Technology | Pamantasan ng Lungsod ng Valenzuela | 2016

Languages: English (Professional proficiency), Filipino (Native)
